THE AI GENERALIST

A 3 Months Execution Program

Your Roadmap to a Future Proof AI Career

50+ Live Sessions • 5 AI Builds • 1 New Identity

📧 info@onrol.in | 📞 96093 12345

Congratulations...

If you've reached this page, you're already ahead of most people. You've stopped scrolling through AI tutorials. You've started looking for a real path. That alone separates **you from the 97 out of 100 people** who will spend the next year watching videos and building nothing. This brochure is not a marketing document. It's a description of a program that turns **AI-curious students and professionals into AI Builders.**

— The DNRQL Team

Why This Program Exists?

The Problem

In 2026, AI is no longer optional. Every industry is rebuilding around it. Every company is hiring for it. Every freelancer who uses AI well is earning more than who don't. And yet, most people learning AI today are stuck in the same loop:

- ▶ Watch a YouTube tutorial on ChatGPT.
- ▶ Try a tool for a day.
- ▶ Get distracted by the next tool.
- ▶ Build nothing. Ship nothing. Earn nothing.

The ONROL Difference

The internet has trained an Entire Generation to be AI consumers.
We're transforming a generation to become AI Builders.

Every single day of the program, you will produce something shareable, postable that can replace your resume. By end of the program, you will have a public portfolio, five working AI systems, and your first real client engagement not a certificate

*"In 2026, the most valuable people are not those who know AI.
They are those who build with it."*

— Future of Jobs Report, World Economic Forum.

Who This Program Is For?

The AI Generalist program is built for ambitious people who want to do, not just learn. You can commit two hours a day; not more, but not less. If you see yourself in any of the descriptions below.

Then this Is For You

We've found that the people who get the most out of this program share three traits: they practice daily, they ask for help when stuck, and they treat the 3 Months as a sprint, not a marathon.

What You'll Walk Away With?

By end of the program, you will have built and publicly shipped five complete AI systems. These are not toy projects. Each one is something businesses pay real money for and each one becomes a piece of your portfolio.

"By 2027, India will need over 1 million AI-skilled professionals. Today, fewer than 100,000 are job-ready."

- NASSCOM Future Skills Report

Your AI Learning Journey

The program is structured across 5 Modules. Each Module builds on the previous. By the end of each Module, you'll have produced concrete deliverables and shipped them publicly.

Module - 01

AI Foundations +
Prompting +
Diffusion Models

Module - 03

AI Agents +
Agentic Workflows

Module - 05

Claude Ecosystem
+ Career Growth

Automation +
Workflows

Module - 02

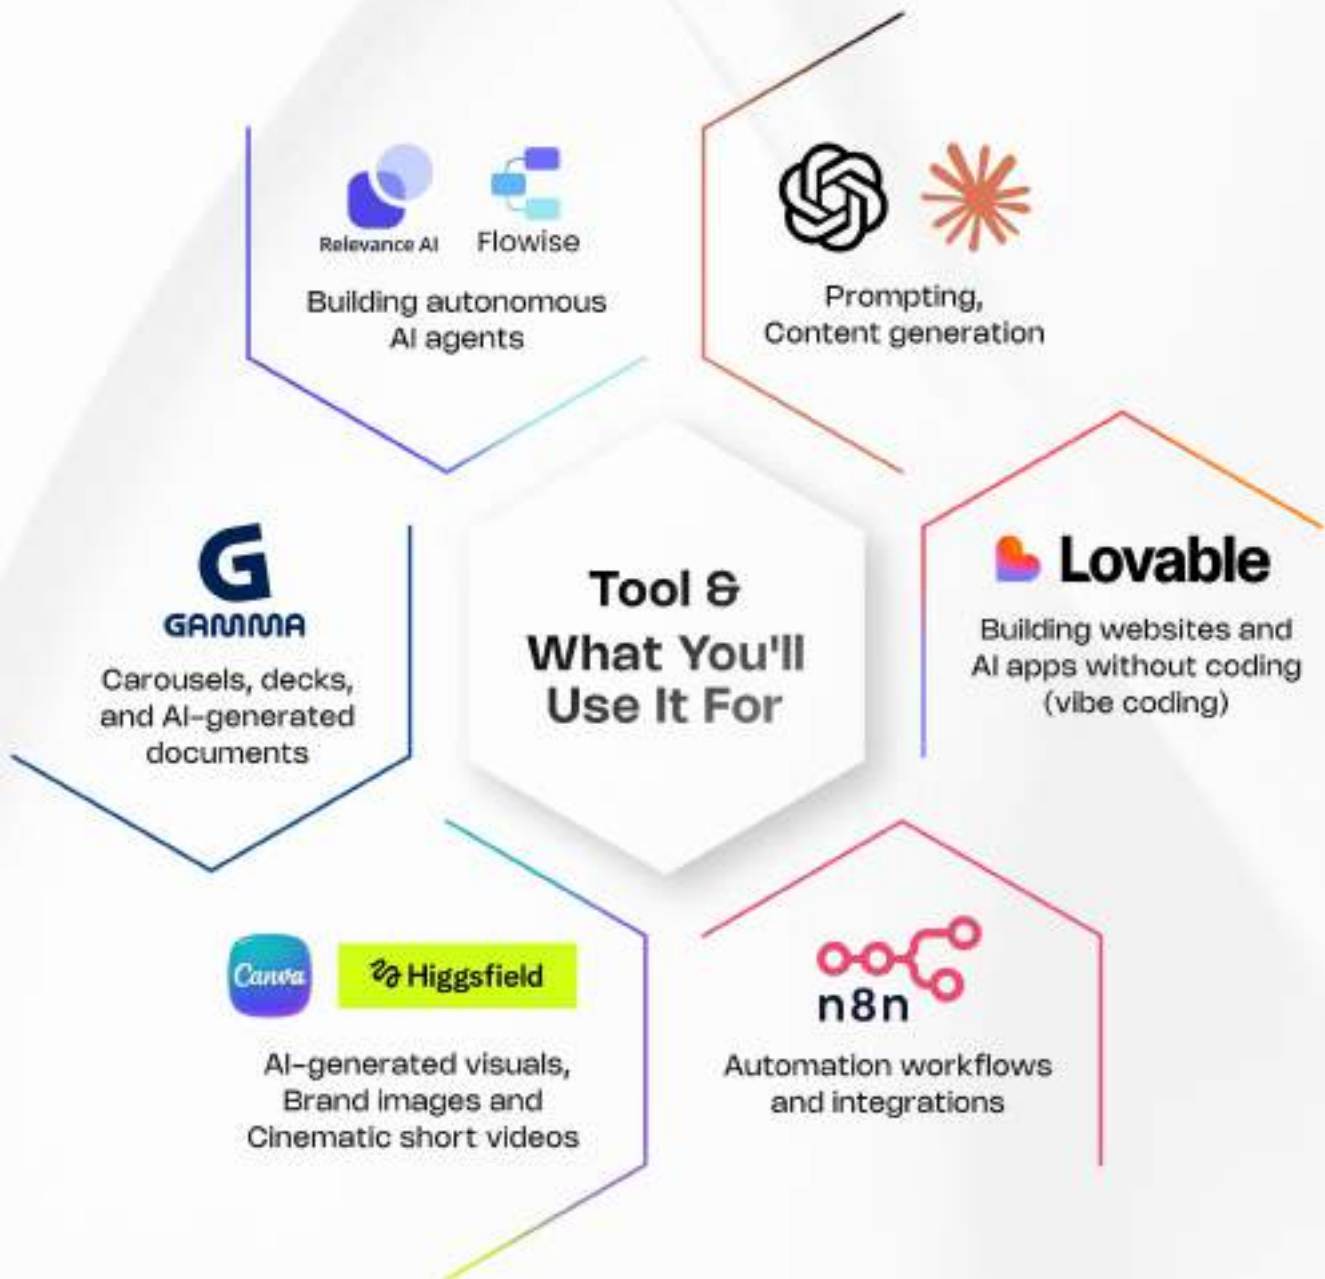

Vibe Coding +
App Development

Module - 04

The Builder Stack

Rather than introducing 20 tools and mastering none, we focus on six core tools that cover 80% of what you'll need as an AI Generalist. Each is industry-standard and free to start.

"The best AI use case is not replacing humans. It is enabling individuals to operate at the productivity of teams."

— Sam Altman, CEO, OpenAI

Your Investment

The AI Generalist program is priced to be accessible to students and working professionals, while reflecting the depth of value delivered. We follow a flat pricing policy no discounts, no upsells, no surprise charges. Every builder in the cohort pays the same fee, ensuring a community of equal commitment.

Program Fee

₹60,000

All-inclusive • Flat pricing

What's Included in the Fee

- 6 Months of access to the LMS
- Access to exclusive Onrol community
- All session recordings available in the LMS
- Templates, prompts, and workflow libraries
- Personalized portfolio review by end of the program
- ONROL AI Generalist certification + Builder badge
- Eligibility for future cohorts and advanced programs

What's Not Included

- Paid subscriptions to third-party tools (most have free tiers sufficient for the program; estimated optional cost ₹0–₹2,000 if you choose paid tiers)
- Domain and hosting for personal portfolio (₹500–₹1,500 if you choose to buy)

Program Logistics

Frequently Asked Questions

I have zero coding background. Can I do this?

Yes. The program is built for non-coders. We use vibe coding (prompt-to-app tools like Lovable) and no-code workflow tools (like n8n) so you can build production-ready systems without writing traditional code. If you can describe what you want clearly, you can build it.

I'm a working professional. Can I really do this in 1–2 hours a day?

Yes. The program is engineered for this exact commitment level. Live sessions are recorded for replay. Many of our most successful builders have full-time jobs.

What if I miss a day or two?

Every day's content is recorded and remains available. Peer pod members will help you catch up. This program built into the schedule for anyone falling behind. The structure is designed for real life, not perfection.

Is the certificate recognized?

The ONROL certificate validates that you've completed a rigorous program with shipped deliverables. More importantly, the public portfolio you build during the program is what employers and clients actually look at. Your work is your credential.

Will I really earn money during the program?

We provide the framework, outreach scripts, and platform setup. Your earnings depend on your effort in client outreach. Most committed builders earn their first ₹500–₹5,000 by Module 3 and ₹5,000–₹15,000 by Module 4. The income journey shown earlier is realistic, not guaranteed.

When does the next cohort start?

Cohorts run regularly throughout the year. Visit www.onrol.in or apply via the QR code below to see current cohort dates and availability.

Ready to Become

An AI Builder?
